#### **TERMS & CONDITIONS**

Terms are cash. The cattle sell under the standard terms and conditions recommended by the North American Limousin Foundation.

#### HERD HEALTH

All bulls will be accompanied with proper health certificates for immediate shipment to most locations in the United States. All cattle have been tested for: Arthrogryposis Multiplex (AM), Neuropathic Hydrocephalus Free (NH), Homozygous Polled and Black, and have had passed breeding soundness exams. All bulls are virgins and have been Trich tested and PAP scored at 4,809 ft.

#### **VACCINATION PROGRAM**

All bulls selling have been vaccinated/poured with Ivomec, Spirovac VL5, Titanium 5, TSV-2, Vision 7 Somnus with SPUR.

#### SUPPLEMENTAL INFORMATION

A supplement sheet with additional information will be available on sale day and online at *magnesscattle.com* 

#### **ANNOUNCEMENTS**

Announcements made sale day and from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with the sale.

#### **INSURANCE**

Insurance will be available through Grassroots Insurance, 515-229-5227, sale day.

#### TRUCKING

Truckers will be available to assist you in shipping your purchase.

Watch and bid LIVE on the Internet at SUPERIORCLICKTOBID.COM

#### **PROGRESSIVE CATTLEMEN.**

We cordially welcome you to the 5th Annual Magness Land & Cattle Western Slope Bull Sale scheduled for Saturday, April 3, 2021, at the Western Slope Cattlemen's Livestock Auction in Loma, Colorado. The bulls selling are Spring Yearlings that have ultrasound data, are semen tested, PAP scores and ready to go to work. This offering of bulls has been developed at an honest rate of feed consumption with longevity in mind and sorted based on calving-ease, elevation adaptability and structural integrity designed to handle various terrains.

Of the many factors that affect the bottom line in this business, the bull power we use in our breeding programs is the one factor we have the most control over, particularly in the commercial cow-calf segment of our industry. To that end, in this catalog, you will find EPD profiles that reflect the very best Limousin, Lim-Flex and Angus genetics available in the country. Furthermore, you will find PAP scores, ultrasound data and performance data including actual birth weight, adjusted weaning weight, adjusted yearling weight, adjusted scrotal circumference, ribeye area and percent IMF. When you analyze the bulls phenotypically, you will find the bulls to be docile, structurally correct, muscular and easy fleshing. In addition, you can add the inherent value of heterosis to the performance of your calf crop. While the beef cattle industry is experiencing a market correction as it relates to 2016, the fact remains, the premium placed on genetically superior calves is also at an all-time high. The bulls that can sire market-topping calves are available in this sale as indicated by their visual traits and outstanding genetic profiles.

Once again we are offering a 5% discount with the purchase of 5-9 bulls and a 10% discount with the purchase of 10 bulls or more. Buyers also have the option to put one-third down sale day with the balance due October 15, 2021, for any bulls purchased in this sale. As always, we fully and unconditionally guaranteed the bulls to be breeders for the first breeding season as it relates to fertility. Please study our extended bull warranty program that covers not only fertility issues but, also injury, loss of use or death (find further details on page 5).

We look forward to your attendance. Plan to join us for lunch, and should you have any questions don't hesitate to call John Pence, Kiley McKinna or other members of the sale staff listed in the catalog.

Sincerely, Gary Magness

## THE MAGS PROGRAM YOU'RE NOT JUST BUYING A BULL. YOU'RE BUYING AN INDUSTRY-LEADING PROGRAM.

#### **0% FINANCING**

Pay 1/3 of purchase price at the sale. Balance is due October 15, 2021.

#### **VOLUME PURCHASE PROGRAM**

Buy in bulk and receive a discount. Buy 5-9 bulls and receive a 5% discount. Buy 10 or more bulls and receive a 10% discount.

#### GUARANTEED SIGHT-UNSEEN PURCHASE PROGRAM

Our sight-unseen program is simple. If you can't attend, call Kiley McKinna, 402-350-3447 or John Pence, 970-396-3584, and give them your specifications and budget. We will provide you with a list of bulls we feel will meet your needs. If the bulls don't meet your specifications at delivery, you don't own them. We guarantee your bids will be confidential and your purchases will be executed at the lowest bid possible.

#### **BREED-LEADING, PREDICTABLE GENETICS**

We have spent 30 years creating predictable, time-tested genetics with the combination of balanced EPDs and off the charts performance data. Our cattle perform on paper and in the pasture.

Limousin and Lim-Flex (Angus Hybrid) cattle deliver to your bottom line. With superior genetics, a simple crossbreeding plan and state-of-the-art selection tools, Limousin and Lim-Flex (Angus Hybrid) serve profit-minded cow/calf producers.

Using Limousin and Lim-Flex makes economic sense. Heterosis and breed complementarity are powerful forces that combine to produce the biggest advantage of beef cattle crossbreeding. This crossbred advantage can amount to as much as 25 percent greater lifetime productivity for crossbred cows as compared to straightbred cows.

At Magness cattle we offer a variety of genetic options to match your program's needs and market goals. Crossbreeding for the right blend of muscle, maternal ability and profit is easy with Limousin seedstock from Magness Land & Cattle.

With more than 30 years experience in the Limousin seedstock industry and 70 years in the commerical cattle business, Magness understands what it takes to be successful and we strive to assure the same success is enjoyed by our bulls customers.

#### SPRING YEARLING BULLS

Being one of the largest suppliers of Lim-Flex bulls in the nation is a job we take very seriously. Given the volume of bulls we sell and the variety of customers we must service, we work diligently to provide a unique cross-section of bulls both from a parentage standpoint, as well as from an end product standpoint. Needless to say, we are extremely proud of the yearling bulls brought forth to you this year for your appraisal. We truly feel there is something for everyone whether it be calving-ease, high marbling, impressive growth, altitude tested or combination bulls that do many things very well. As customers, we value your comments and suggestions on how we can provide you an even better product in the future.

## **BULL WARRANTY PROGRAM**

In an effort to protect, simplify and enhance your MAGS bull purchasing experience, we are pleased to introduce our herd bull warranty program.

We offer the following options and are required to be paid on the day of the sale. It is the buyer's responsibility to purchase at the settlement desk.

#### PLAN DURATION RATE

#1	6 months	3% of Purchase Price
#2	12 months	6% of Purchase Price

#### WARRANTY COVERAGE PLAN 1 6 months • 3% of Purchase Price

This plan covers the bull through the spring breeding season and is 100% of the purchase price less the salvage value when applicable.

#### PLAN 2 12 months • 6% of Purchase Price

This plan covers the bull for a full year which will include two breeding season (spring and fall) and one wintering period. In Plan #2 the warranty covers 85% of the purchase price less the salvage value when applicable. Magness Land & Cattle guarantees to sell a bull that is sound and has passed a semen test by an accredited veterinarian. Should any bull purchased through the Magness Land & Cattle bull sale fail to be a satisfactory breeder or be unable to physically service a cow or heifer, he will be replaced with a bull of equal value. Should this not be possible, we will issue a credit to go towards the purchase of another bull. We will not however provide warranty for mismanagement.

While under our warranty the bull is covered for injury, sickness or death. We will service your needs with a replacement bull or sale credit. Should you have any problems with a bull please contact John Pence and he will work to make sure your cows get bred and you are a satisfied customer. We do have back up bulls set aside, which will be first resolution to any warranty issues. The Warranty Program is designed to protect your purchase during the most high risk time of a bull's life.

#### **Exclusion to Warranty:**

Any injury or death due to malicious, willful or intentional acts or mistreatment are considered fraudulent claims.

Should an issue arise with your bull please notify Magness Land & Cattle immediately by phone, 970-785-6170 or 970-396-3584. You will also need to contact a licensed veterinarian to diagnose and treat the animal and fill out a vet form. If the animal dies, a post mortem will be required.

Note: All buyers that opt to utilize the Magness Land & Cattle financing program will be automatically charged the Plan #1 6-month bull warranty on their invoice. This is designed to protect both the buyer and seller.

## OUR BULLS PERFORM AT THE HIGHEST LEVELS

#### PAP TESTING

Cattlemen running cattle at elevations above 5,000 feet are inherently aware of a condition known as Brisket Disease. Brisket Disease, also known as High Mountain Disease or Dropsy, is one of the Rocky Mountain Region's most costly diseases with instances up to a 30% death loss. Brisket Disease can be associated with abortions, dead calves at birth, peewee calves at weaning, and the most commonly distinguished symptom, retained fluid in the chest area and eventually death.

Cattle differ in how they respond to the availability of oxygen associated with a raise in elevation. In order to handle the lack of oxygen, cattle respond by constricting vessels to push blood through more area of the lung to gather more oxygen. This in turn causes the walls of the arteries in the lungs to thicken. This causes the heart to pump harder in order to get enough blood through the thickened arteries. If these conditions become too acute, the heart will actually pump hard enough to push fluid through the walls of the pulmonary artery and blood vessels. This fluid is what causes the swelling of the chest in cattle with Brisket Disease.

Research has shown the thickening of the walls of the arteries, which causes Brisket Disease, to be highly heritable. This means it can be controlled with proper genetic management. There are two ways to stop susceptibility to Brisket. The first is natural selection. When cattle are ran at higher elevations for extended periods of time the disease will take it's toll. Cattle exhibiting signs of Brisket will be culled due to the poor performance associated with the disease.

The second method used to control Brisket Disease is Pulmonary Arterial Pressures (PAP) testing. PAP scores are obtained by a procedure called "right heart/ pulmonary artery catheterization". A true average pressure is measured in millimeters of mercury (mmHg). Using natural selection in your cow herd to eliminate cattle susceptible in your herd and requiring all new genetics (your bulls) to be properly PAP tested is a very effective way to control Brisket Disease.

PAP testing is a tool, that when used correctly, can increase the overall performance of cattle run at higher elevations. Given it's importance to profitability for ranchers who run their cattle at altitude, Magness Land & Cattle is providing PAP scores on all bulls selling. Bulls were also trichomoniasis tested and can go anywhere in the United States. Whats more, every was fertility tested and sells fully guaranteed as outlined on Page 5.

Note: PAP scores were recorded by Dr. Tim Holt at Colorado State University

# YEARLING BULLS LOTS 101-151

#### **INDUSTRY BUILT & CUSTOMER TESTED**

The yearling bulls segment of this sale is a direct reflection of our commitment to raising production cattle. Our production philosophy is simple - we aim to create a product that's reproductively sound, easy calving, high performance and mainstream acceptable. It's our goal that this group of yearling bulls on offer, which feature only the best in Lim-Flex genetics, will translate not only into your program seamlessly, but the results of their breeding will also meet your customers' targets.

What an exceptional way to lead off this impressive offering! MAGS Hodaddy 1648H ET combines a notable pedigree, a balanced EPD profile, and eye catching phenotype. He is sired by the proven PBRS Bunk House 48B, who has sired many elite genetics all over the country that are admired by many great cattlemen. His donor dam is PBRS Classen ET, who goes back to the great angus sire EXAR Classen 1422B. On paper he ranks in the top 15% for marbling and top 15% for main stream terminal index. Aside from his numerical advantages, phenotypically he is heavily structured, big bodied, level topped, with extra muscle expression and free moving off both ends of his skeleton. This homozygous polled, heterozygous black herd sire is going to do big things for the winning bidder. Make that be you.

## **CALVING EASE** MEANS PROFIT

Calving-ease and calf vigor are traits upon which the Limousin breed was founded on in this country. Relative to growth, the Limousin breed remains a calving-ease leader. Easy births not only allow cows the opportunity to breed back faster, they ultimatley result in more pounds to sell at weaning.

We have made a concentrated effort to bring you a variety of bulls that excel in the beef industry's Number 1 profitability trait—calving-ease. Take note, we have gone the extra mile in our breeding program to propagate genetics that excel in terms of calving-ease by utilizing genetics we know are easy calving.

As you study the table below, you will notice the bulls offered in this sale excel in all three calving-ease measurements—Calving East Direct, Birth Weight and Calving Ease Maternal. However, as evidenced by the table we have been able to maintain industry leading levels of calving-ease without sacrificing growth and carcass performance. Take note of how our Weaning Weight, Yearling Weight and Carcass EPDs stack up not only to Limousin and Lim-Flex (Angus Hybrids) breed averages, but to other competing breeds as well.

The bottom line is this, with Magness Land & Cattle bulls, you CAN have the best of both worlds. Calves that come light and easy at birth, but with the inherent genetic ability to efficiently produce pounds—that is a profitable combination.

## LIMOUSIN TODAY - PROFIT TOMORROW

"We use Lim-Flex<sup>®</sup> bulls on our British-based cows because it allows us to achieve our goal of producing a high percentage of cattle that grade Choice, have higher yielding carcasses, while maintaining feed efficiency and uniformity."

Erik Roen Sierra Valley Ranch, California

#### Limousin and Lim-Flex<sup>®</sup> (Limousin x Angus hybrid) deliver to your bottom line.

- Calving ease & calf vigor
- More pounds to sell at weaning
- Feed efficiency

- Tested & proven docility
- Cow & bull longevity
- Carcass merit

To find out more about how you can profit tomorrow with Limousin or LIm-Flex<sup>®</sup> bulls and females, contact a NALF regional manager or visit www.NALF.org.

North American Limousin Foundation • 303-220-1693 • Limousin@NALF.org • NALF.org
