*43rd Annual*  
**MUSCLE UP  
FOR PROFIT**  
*Sale*

**Thursday, February 23, 2023 • 1PM**  
**At the Farm - Amherst, South Dakota**

Welcome to our 43rd Annual Production Sale. This marks our 52nd year of producing Limousin cattle. We present a high-quality and data-based set of bulls and females for your appraisal that will add efficiency and muscle to your commercial programs and seedstock operations. As usual, we collect the data you want to use- all the way from weights to carcass and DNA. This year, we took two separate pens of three bulls to Denver. They are Lots 1-7. Both pens did well. The April bulls won their division and the March bulls were Reserve in their division.

As reflect back on the past generations and people that have influenced and guided our decisions throughout the years, this life is more than making decisions about what genetics to use. Our heritage for past generations has taught us to be good stewards of livestock and land, and to not forget our faith in the One that created and owns all that we have. In this light, we dedicate our work and efforts to those in our family who have passed on in recent years, namely, Irwin Symens and Herman & Judy Symens. Also, to several Limousin breeders, and friends, too many to mention here, who have helped keep our breed moving forward.

The Limousin breed has much to offer the beef industry in the future and we are proud to be a part of it. Please go through this catalog and the videos on DVAAuction. Call with any questions and feel free to stop and look through the cattle. The coffee is always on. We will see you February 23 for the sale.

THANK YOU.

Symens Bros.

Limousin Friends,

It is our sincere pleasure to be working side by side with the Symens family to present their 43rd Annual Muscle Up For Profit Production Sale offering.

You have come to expect excellence from the Symens program and your interest in their genetics is certainly appreciated. Bulls and females carrying the SYES prefix can be found working from South Dakota to both coasts and borders. It is truly impressive when you consider their half century involvement in the breed and the fact their genetics positively influence both purebred and commercial herds across the country.

Take comfort in the fact the Symens operation keeps a keen eye on how their genetics perform from birth all the way to the rail. In an effort to better predict how their genetics will perform, notice that animals in the sale have been genomically-tested. The end result of this meticulous attention to each and every detail are bulls and females proven to work in a variety of herds.

It should come as no surprise that customer service remains a top priority, and that each and every customer is important to the success of their program. Many of you reading this catalog are previous customers-a return customer is the ultimate compliment. These repeat customers are a true testament to both the genetics offered as well as the people who stand behind them.

We hope you will be able to attend the sale in person to take part in the hospitality the Symens program is known for.

Thank you again for your interest in this offering. Please do not hesitate to contact us. We are here to assist you in any way possible.

Regards,

Kiley McKinna

Fargo, ND • 125 miles away  
Sioux Falls, SD • 200 Miles Away

## GENOMICALLY-ENHANCED EPDS

Animals in the sale have been genetically tested. These EPDs are re-evaluated more often than before so they will change more often. GE-EPDs provide more precise EPDs based on a combination of pedigree, phenotype and DNA. One major benefit is risk reduction through increased accuracies on many traits—the equivalent to having 8-20 progeny. This saves time when assessing young breeding stock and delivers commercial customers more confidence when buying seedstock.

Also, if you look under the EPD block of information, there is a % rank category with numbers showing where each animal ranks within the population. This will help you select bulls high in the traits important to you.

EPDs dated 1/23/23

# LIMOUSIN BULLS

## Lots 1-101

For nearly 50 years we have taken our role as professional seedstock producers very seriously. Our goal has always been to supply genetics capable of helping our customers succeed. As you study this set of bulls, know that every effort has been made to manage, measure, evaluate and represent these bulls in a manner consistent with our philosophy to insure 100% customer satisfaction.

The bulls were weaned in October and put on a grower ration of prairie hay, corn silage, corn and supplement to project a 3.5 lb per day gain. After taking yearling weights they will be backed off to prepare them for breeding in the pasture this summer. They were poured for lice in December and again if needed. We will have a supplement sheet prior to the sale with adjusted ultrasound carcass data, adjusted yearling weights and scrotal measurements. We are confident all bulls should calve virtually unassisted on mature cows.

- Will keep and feed bulls until April 15.
- Free delivery to 400 miles or central points.
- First breeding season guarantee.

Member of 2023 National Western Grand Champion Division VI Pen of Limousin Bulls. Leading off our 43rd Annual Sale is SYES Kept Over. This double homozygous son of JBV Yellowstone is out of a fantastic COLE Businessman daughter. This is a great bull to start off our 2023 offering. Kept Over is stout in his features with a big square hip and lots of muscle shape that ties down nicely to his quarter. With added depth of rib and flank and a smooth shoulder, this herd-sire prospect will serve his new owners well for years to come. When you factor in his breed-leading numerical profile you really start to get excited! He ranks in the top 10% for weaning and yearling weight, scrotal and total maternal; top 1% for ribeye area and top 2% for yield grade. There is a lot to like about this bull. With his powerful phenotype, genotype and lineage, he offers you a package known for adding end product merit!

SYES Krypton offers you a dominating phenotype backed up with elite growth and milk. This homozygous polled Wulfs Horton son is from JYF Zeek daughter who mashed the scales down at 838 pounds at weaning time. He ranks in the top 10% for weaning weight, top 15% for yearling weight, top 1% for milking ability and total maternal. This direct combination of performance, maternal ability and extraordinary phenotype make this individual highly sought after.

# BRED HEIFERS

## Lots 102-113

The bred heifers presented here represent our 50 year commitment to the Limousin breed and the producers who have come to rely on the muscle, growth and efficiency inherent to the Limousin breed. They sell bred to SYES Easy Going 77E, SYES Encore 315E, SYES John Doe 123J, WZRK Jimmy Dean 9040J or Lewis Gravity Flow G62. We selected these bulls for calving-ease as well as growth traits. The projected due dates are based on ultrasound pregnancy testing done in September. Those bred earliest will be due shortly after the sale and we will help arrange delivery as soon as possible. They have had 2 rounds of Guardian vaccinations for scour prevention. We encourage you to be prepared to take the females home early so they may acclimate to your environmental conditions prior to calving. If you take them home sale day we will credit you \$50 per head.

## OPEN HEIFERS

### Lots 114-126

This top-notch set of yearling heifers were selected based on their conformation, pedigree history and EPDs in order to predict superior future production. Just as with their yearling bull contemporaries, since birth, these heifers have sorted themselves toward the top of their respective calf crop. In many instances, their genetic makeup is similar to the females we have chosen to retain in the herd to produce the next generation of SYES bulls and replacement females. We encourage you to take these females home early so they may adapt to your management style prior to showing or breeding. If you take them home sale day we will credit you \$50 per head.

**Symens Brothers**  
Limousin

"We have purchased a few bull's from Symens Brothers over the years. They have always added extra pounds and calmness to our calf crops. We purchased a bull called Hat Trick. We couldn't be happier with a bull. He is just so easy going and did a great job in the pasture. We turned him in with 26 females and according to the vet they were all bred within 30-40 days of his exposure date. That summer was very hot and dry. We will be back to buy more bulls from Symens Brothers. They are good people with good cattle."

Mark Van Santen  
Battle Lake, MN
