SELLING 65 ANGUS & LIM-FLEX BULLS, 12 FEMALES & GENETIC OPPORTUNITIES

Welcome back to our 3rd Annual Spring Production Sale!

On behalf of the entire Haden family, we are excited to offer this set of bulls, females, and genetic opportunities for your appraisal. The early 2025 reports from BRCC customer calves selling have been great to hear. We know the work, commitment, and sacrifice our customers put into raising cattle and are happy to see the market rewarding you. Our enthusiasm and optimism remain high at Buck Ridge. The values and work ethic across rural America continue to impress us daily. This set of fall born bulls is our largest yet and we believe they are well prepared to work across cow country this spring with the help of added age. The sale will take place at our headquarters here in Southern Wright County and we will have online bidding available through DV Auction. Come early to enjoy the fellowship amongst friends and cattlemen. Sale day has become a favorite time of year for us to visit with so many great people. Lunch will be served at starting at 12:30 pm with the auction to follow at 2:00 pm.

These cattle represent our breeding philosophies well and are accompanied by all the performance data to allow you to make the most informed decision. We hope as you study the sale information you can appreciate our dedication to raising balanced cattle with above average growth and carcass traits built in while keeping maternal function, fertility, and phenotype at the forefront of our culling criteria. At Buck Ridge, our cattle are managed on fescue pasture year-round just like our commercial cattleman neighbors.

BRCC bulls sell with a breeding soundness exam and are a part of a full herd health protocol administered by our veterinarian, Dr. Michael Spragg, DVM of Spragg Veterinary Clinic. We are thankful for his great service, knowledge, and friendship over the last 20 years.

Buck Ridge Cattle Company is a family owned and operated operation. We take a huge amount of pride in that statement. We know firsthand the time and financial commitment that our customers have invested in their farms, ranches, and cattle. Our passion for raising the best quality genetics and selling them at fair value is as strong as ever and we are excited about the future of the beef industry. This sale would not be possible without the efforts of many and for that we are thankful.

In closing, thank you for the taking the time to look at our offering. We are extremely honored to continue to work with our repeat customers and would be grateful for the business of first-time customers. We know there are plenty of places to buy bulls. Our commitment to you is that we will be working hard every day to improve our cattle and provide the upmost support for our customers in any way we can. Should any issues arise, we are committed to making it right and maintaining a successful long-term relationship.

Please feel free to call, message, or stop by anytime to look at the offering or discuss any questions you might have.

*Thank You & God Bless,
Mark Haden, Logan Haden, and family*

ONLINE BIDDING

The sale will be broadcast live on DV Auction. Please register to bid at least 24 hours in advance of the sale.

USING QR CODES

Each lot has a unique QR Code that will play a video of that specific bull.

1. Open the camera app on your smart device.
2. Hover over the QR Code in the catalog.
3. Tap the link that appears to view a video of that specific lot.

Please note that videos will not be available until two weeks prior to the sale.

CORBITT WALL 11:00 AM
LUNCH SERVED AT 12:30 PM
SALE AT 2:00 PM

Selling 65 Angus & Lim-Flex Bulls and 12 Females and Genetic Opportunities

ANNOUNCEMENTS

- A sale day meal will be provided.
- The cattle are on site and can be viewed any time.
- The cattle will sell on TV screens in our sale facility.

An up-to-date supplement sheet will be provided sale day. All announcements made from the sale block take precedence over printed material in this sale book

GUARANTEE

All bulls selling are fertile to the best of our knowledge and have passed a breeding soundness exam by a licensed veterinarian. Bulls that sell for \$3,000 or more come with a 1st breeding season guarantee. The 1st breeding season is defined as the 90 days following the first turn out. Should the bull become injured at any point in the 1st breeding season, a satisfactory replacement will be given if available or sale credit in a future Buck Ridge Sale equal to the purchase price less salvage value. Please contact us immediately if an injury occurs so we can quickly make it right.

BULL DELIVERY

Free nationwide delivery to central hub locations across the continental United States. We will make every effort to get the animals delivered in a safe and timely manner.

Summary

Directions to the Sale Site

Angus UNDERSTANDING THE DATA

Production

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Management

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Carcass

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Values

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

ANGUS BULLS

Lot 1 Leading off the 2025 Spring Production Sale is BRCC Redemption 3539. He checks a lot of boxes. Breed leading growth, milk, and carcass makes him an all-around profit producing bull. His phenotype makes him easy to find in the bull pen. Long down the spine, deep sided, and full of read meat. He is backed by the Rita cow family that have been proven for bringing in pounds at weaning time. Don't miss his individual ratios of 114 at WW, 112 at YW, and plenty of marbling with a 113 IMF ratio. Let 3539 redeem your calf crop!

Top 5% WW • Top 4% YW • Top 15% MILK

Top 10% \$W • Top 10% \$F • Top 10% \$G • Top 10% \$B

Top 10% \$C • 114 WW ratio • 112 YW ratio • 113 IMF ratio

ANGUS BULLS

Lot 2 & 3

Lot 2 & 3 rise to the top of the weight sorts for WW and YW. Boasting 116 and 113 YW ratios! Paternal brothers on the top side and from a mother, daughter duo on the bottom side. The blood runs thick. Take these 2 brutes home to put an extra shot of muscle, growth, and consistency into your calf crop. They are long in the spine and massive when you inspect them across the chest and topline.

Lots 5&6

Offering two high powered sons from the pathfinder donor BRCC Blackcap 8580. She earned pathfinder status as soon as she was age eligible. 8580 does so many things we desire in a productive cow running on Southern Missouri fescue. High volume, easy keeping, and feminine. She maintains her condition without sacrificing production in her calf. Look to her sons to add performance through volume and width. Keep the heifers!

Thank you Spragg Veterinary Clinic

It is often said amongst cattle producers how important it is to have a good relationship with your veterinarian. We are blessed with the best service from Spragg Veterinary Clinic. The service, sacrifice, and knowledge is second to none. Dr. Michael Spragg and the team are crucial to the success of the BRCC cowherd. To top it off, in over 20 years of vet calls, Dr. Michael has never been known to repeat a chute side story!

Mercantile Sons

SS Mercantile H87 is the type of herd sire who will leave a legacy through his daughters for years to come. He first surfaced to the top at the 2021 Midland Bull Test where he exhibited excellent muscle expression, rib shape, and an overall balance that the commercial cow man needs in his herd. His story is still young and while he left several breeding pieces at BRCC he currently roams the pastures of the prestigious Angus herds at Musgrave Angus and Baldrige Performance Angus.

American Angus \$Value Indexes Explanation

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Capital Gains Sons

These paternal brothers by BRCC herd sire, Capital Gains 9502, who has been excellent at consistently siring calving ease and stamping his progeny. Even better, they offer carcass and maternal ability to go along with it. Their sire is easy fleshing, heavy muscled, and long bodied.

Limousin UNDERSTANDING THE DATA

Maternal and Growth Traits

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Scrotal circumference (SC): Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

Docility (Doc): Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

Milk (MK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. $TM\ Index = MK\ EPD + \frac{1}{2} WW\ EPD$.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Carcass Traits

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Mainstream Terminal Index (\$MTI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield

LIM-FLEX CATTLE CAN DO IT ALL!

Excellent Quality Grade with Superior Yield Grade

CUSTOMER *success*

LIM-FLEX
Limousin x Angus Hybrid

Cramer Farms is a progressive crop and cattle operation in northern Missouri. They have been Buck Ridge bull customers and friends for the past 15 years. Below is harvest data from a set of cattle they fed and sold on the grid.

✓ 58% CAB or Prime

✓ 100% Choice & Above

✓ 65% Yield

Amazing combination of quality and red meat yield with no YG4 or YG5 deductions!

LIM-FLEX BULLS

Lot 38 BRCC Heavy Hitter 3768L comes as the lead of bull in the Lim-Flex division for good reason. When you study this herd sire prospect on foot, you can appreciate his base width, fleshing ability, and soundness. 3768 has performed from the start and been a standout since a calf. Starting out at 74 lbs and posted a 136 WW ratio and 118 YW ratio! To top it off, he added a 120 REA ratio and 130 IMF ratio. A true curve bender herd sire. Dive into his genetic predictions and continue to be impressed. He is heifer safe with a 16 CED coupled with top 1% growth and he keeps going to the rail with a top 1% \$Total Profit Index. Need it all? You can have it with Lot 38.

Maternal Brother of Lot 39

BRCC Kash Krop 2688K

Owned with D&S Cattle and 4H Limousin

Lot 39

Herd Sire Alert! BRCC Jet 3776L has the pieces to be an elite herd sire. This homozygous black, homozygous polled 60% Lim-Flex boasts a 122 WW ratio. We appreciate his length of spine, thickness from front to back, and the added muscle expression in his front quarter. He is the natural calf to donor dam HBRL Ever Classy 7536E who is one of our favorite Lim-Flex females in the BRCC herd. 7536 is a herd bull maker regardless of who she is bred to! Lot 39 is maternal brother to the Fall 2023 lead off bull, BRCC Kash Krop 2688K, who is now working in the D&S Cattle, 4H Limousin, and BRCC herds.

Homo Polled, Homo Black

Lot 40

Wow, another elite herd sire prospect! Much like Lot 39, BRCC Foundation 3682L, is backed by a special donor dam, HBRL Elegant Lady 7539E. 7539E ranks high amongst our most productive cows. She too has the "it factor" for making herd bulls regardless of the sire on the top side. 3682L comes in a homozygous black, homozygous polled 60% Lim-Flex package. He is stout, wide based, and has the extra fleshing ability and thickness from his mother. Performance and cow power have collided in Lot 40! He is a maternal brother to the Spring 2024 high seller, BRCC Key Player 2683K, who is working in the Meredith Limousin and BRCC herds.

USING QR CODES

Each lot has a unique QR Code that will play a video of that specific bull.

1. Open the camera app on your smart device.
2. Hover over the QR Code in the catalog.
3. Tap the link that appears to view a video of that specific lot.

Please note that videos will not be available until two weeks prior to the sale.

ABOUT BUCK RIDGE

BUCK RIDGE CATTLE COMPANY is owned and operated as a family partnership in Southern Missouri on over 2,000 acres of fescue dominant pasture and hay ground. Our headquarters are located in Wright County. The BRCC operation started with very humble beginnings and has been in a constant state of growth over the last 20 years since those first 9 commercial cows were purchased.

It has become our life's passion to raise cattle and make the best product possible for our customers. We currently breed around 400 females annually using artificial insemination or embryo transplant. The BRCC cow herd is managed using rotational grazing with stockpiled fescue being our primary winter feed source. The cattle are expected to perform well and breed back in a short window while on pasture with minimal supplementation. Our Angus and Lim-Flex cattle have built in traits to ensure they will perform in the pasture and feedlot. The Buck Ridge breeding philosophy focuses on fertility, growth, and carcass merit by utilizing EPDs and data collection.

We love to visit with folks about our operation and how Buck Ridge bulls can improve the profitability of our customers' cattle herds. God has blessed our family with the land, cattle, and passion that make up Buck Ridge and we are very excited to continue growing our cowherd in the future.

You're invited!

Pre Sale Speaker - Corbitt Wall - 11 AM

Corbitt Wall is a native of eastern New Mexico and west Texas. He is a fourth generation cattleman and has been a livestock auctioneer for 30 years. Corbitt grew up at his father's side, taking delivery of country cattle purchases off New Mexico ranches and wheat pastures. They were also some of the first to order stocker calves from the Southeast, partnering with shippers from Louisiana, Mississippi, and Florida.

Corbitt received a Bachelor's degree in Agbusiness and Economics plus a Master's degree in Agriculture from West Texas A&M University in Canyon, Texas. Upon graduation, he started an 18 year career with the USDA's Ag Marketing Service and carved a niche in feeder cattle market reporting as the author of the weekly National Feeder & Stocker Cattle Summary. In 2014, Mr. Wall accepted a position with DV Auction as their Commercial Cattle Manager and Livestock Market Analyst.

He relocated back to the Texas Panhandle in 2017, after 16 years in northwest Missouri where he operated a small stocker cattle operation with his three daughters.

Selling Choice

66

Prolific x 212 Sisters

An exciting offering of our most progressive females at BRCC. These 2 sisters show off well for their young donor dam, Musgrave Lady Barbara 212. Ellingson Prolific on the top side doubles down the cow power with maternal excellence. We believe these 2 young females have a bright future in creating the cattle that bring success to commercial cowherds. BRCC Lady Barbara 4002 boasts top 1% WW at 100. BRCC Lady Barbara 4003 brings top 1% \$M at 100! They are very similar in type and kind – deep, sound, and feminine. The consistency of maternal heritage in this pedigree shines through them.
