We've been sourcing and selling Limousin and Lim-Flex semen for 27 years. We stand ready to offer you the ability to mix and match your semen needs and save time and money, with one stop ordering and shipment. Please stop by our website, WWW.GRASSROOTSGENETICS.COM for the latest in bulls, information and pictures. If you need advice or a second opinion, give Mark a call, we love to talk cattle.

Liberty Mutual Specialty Livestock Mortality Coverage
Since 1995 I have been pleased to offer livestock mortality insurance. We are thrilled to offer the products of Liberty Mutual Insurance. If you need to control the risk of your new herd bull or donor female, drop us a line, we can help insure that you sleep easy at night.

We are pleased to have moved the base of Grassroots operations to Maxwell, Iowa, and the steady hand of Jay Steenhoek and the crew at Nichols Cryogenics. We'll be on the road as always, but we will also be answering the phone at Grassroots and working everyday to get you the genetics you desire.

On days when you may not have the time to do your research and fine tune your details, it doesn't hurt to lean on a few gray hairs to make your load a little lighter. By combining today's latest technology with our 40 years of Limousin experience, we are confident we can help you navigate 21st century seedstock production. If you need help sale day, an outside eye at breeding time, or boots on the ground when you can't be two places at once, we stand ready to put our experience to work for you. We're only a call away if you are looking for new genetics, marketing advice, breeding help or risk management. There may be people that have looked at more Limousin Seedstock than we have, but few have opened more gates.
