AIRPORTS

Columbus Municipal Airport, Norfolk Regional Airport & Omaha Eppley Airfield.

DELIVERY

Free delivery within a 250 mile radius and cost share arrangements will be made for traveling 250+ miles.

ANNOUNCEMENTS

Announcements made sale day will take precedence over printed material in the catalog. Please take note of any changes.

SEMEN

Lonely Valley Seedstock reserves the right to semen interest on any bull in the sale.

TERMS

Terms of the sale are cash unless prior credit arrangements are established between buyer and seller. Settlements are to be made with the clerk immediately after the conclusion of the auction.

MAIL & PHONE BIDS

Mailed or phone bids will be handled in a confidential matter. If you are unable to attend the sale, simply contact anyone in the sale day phone numbers. Please call in advance of the sale so we can help you ringside sale day. All cattle purchased through our 'sight unseen program' are unconditionally guaranteed, if the cattle purchased for you on order are not what you expected, we don't expect you to pay for them, no questions.

BLOOD TYPE FOR PARENTAGE VERIFICATION

All animals sold are guaranteed to be offspring of the recorded parents. Under the rules of NALF, all bulls born after January 1, 1991 that are to be used for artificial insemination or used naturally in a herd other than the owner of record must be parent verified by blood typing to both sire and dam. All females born after July 1, 1987 and December 31, 1990 that are to be used for artificial insemination or naturally in a herd other than the owner of record must be sire verified through blood typing. Sellers shall make the necessary parent blood samples available to purchasers upon written request by the purchaser's so long as a written request is received by sellers within 60 days after the sale of the applicable animal.

LIABILITY

Each animal will be the buyer's risk as soon as it is sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for safety and comfort of those attending the sale.

INSURANCE

Insurance on your purchase can be provided by Mark Smith, Grassroots Genetics & Consulting, Ankeny, IA, 515.229.5227

PAYMENT

Cattle must be paid for at the time of the sale unless prior arrangements are made with sale management at the time of the sale at 615.330.2735. 3% fee on all credit card payments.

WATCH & BID LIVE DVAuction Broadcasting Real-Time Auctions

The 31st Annual Lonely Valley Keepin' Kind Bull & Female Sale can be viewed and bids can be accepted through www.dvauction.com.

Welcome to our 31th Annual 'Keepin' Kind' Production Sale and celebrating over 40 years in the seedstock business. Over the years we have developed and built one of the top Limousin/LimFlex herds in the country. We have also added a core group of Angus cows and recently started to implement a few Red Angus females to the herd. Our goal is to be a one stop shop for all your cattle needs, whether it's Limousin, Angus or Red Angus genetics. We know that there are other places to make your seed stock purchases and we appreciate your loyalty. Last year we sold 95% of our bulls to repeat customers. Taking care of you our customer is out #1 priority. As always, we offer an unconditional guarantee on all cattle sold. If you should have a bull go down during breeding season, we can usually have a replacement for you within a few days, available at our ranch or we will try to meet you half way, depending on the distance. We are very proud to say that we replace very few bulls each year.

Our Nebraska herd consist of over 450 head of registered Limousin, Lim- Flex and Angus cattle. Lonely Valley's Bull Battery continues to be ranked in the top 10% for all EPD traits. Currently our bull battery ranks in the top of the breed for weaning and yearling growth and milk and does so with a low to moderate birth weight. Our Marbling and Scrotal circumference EPD is unsurpassed, not just on one bull, but all LVLS herd sires combined. Forty years of selection pressure really do pay off. We continue to place extensive selection pressure on calm, easy doing cattle. This set of bulls have been easy to work with. You will notice the difference. As well, cows that fail to breed being sent down the road. Fertility in these bulls is excellent with an average scrotal measurement that is unequaled in the Limousin and Angus.

The bulls will be available to be viewed at the ranch near Creston a few days prior to the sale. As well, we will have 300 calves on the ground by sale day and several of the herd bulls for your viewing. We will be serving a complimentary Limousin Beef lunch at 11:00 a.m. Should you need assistance with travel plans, trucking and delivery or anything else, please call and we will be happy to assist you. See you Saturday, February 26th at the Ranch.

Sincerely,
Lonely Valley Seedstock Chad Settje

Dear Cattleman,

It is an honor to once again be involved in the marketing of the Lonely Valley Seedstock genetics. This year the Settje Family will celebrate their 41st year propagating Limousin genetics. This February sale is their 31st consecutive bull sale which makes it one of the longest running family seedstock sales in the Limousin breed.

The Settje name is well thought of throughout the cattle industry as both Dean and Chad have served as past North American Limousin Foundation Presidents and are very much involved in the cattle feeding industry. The family cattle operation started with Stan Settje and his sons acquiring a few purebred Limousin genetics and incorporating into their commercial cattle program. As time went on they quickly realized growing it into a Limousin seedstock operation was the right path moving forward. The program grew to one that could easily sustain a 70-90 head bull sale every year. Under the LVLS umbrella are Limousin, Lim-Flex, Angus and Red Angus genetics.

Their integrity and level headed approach to customer service has kept them going strong for 41 years as a service oriented business.

Please join the Settje Family and all of the marketing team as we know you are sure to be impressed with the strong sale offering.

If we can be of assistance, be sure and let us know and we thank you for your continued interest in the "LVLS" brand.

Sincerely,

Randall O. Ratliff

R & R Marketing Company

LVLS John Wayne 0796J is a high percentage bull with one heck of a set of EPDs. He is a double homozygous son of AHCC Back Again. His dam, LVLS Daria 0794D is a MAGS Zodiac daughter. On paper, he ranks in the fifteenth percentile for his yearling weight figure and in the twentieth percentile for his weaning weight figure. If you're looking for a herd sire prospect with loads of power and grow- you've got to check this guy out. LVLS John Wayne 0796J is a sound structure, big footed bull that is built with function from the ground up. He has the added eye appeal that many cattlemen desire in high performance herd sire prospects.

Here is a high percentage Boyer's Fillmore 4148F son that deserves your attention if you're in the market for a maternally-oriented herd sire prospect. Boyer's Fillmore is a son of ENGD Zip Line 2515Z and out of a MAGS Unreal daughter, JTBO Ms Belive-N-Me 4148. This bull's dam is a daughter of MAGS Zarah. LVLS Maximizer 9070J is impressive from the ground up. He is powerfully made, stout in his hip and tremendous on his feet and legs. He ranks in the fifteenth percentile for his milk figure. LVLS Maximizer 9070J is homozygous polled and double black.

ABOUT OUR CATTLE

FEEDING: The yearling cattle are fed to gain 3.25 per day, receiving a ration of corn gluten and alfalfa. We feed our bulls to gain sufficiently, with- out pushing a lot corn in the ration. We believe that corn causes structure problems later in life and causes yearling bulls to 'melt' when turned out to pasture. We are very proud of the success rate our yearling bulls have had.

SEMEN TESTING: All bulls have been semen tested and measured and a certificate will go with each bull sold.

UNCONDITIONAL GUARANTEE: If the cattle that you purchase at our sale fail to meet your expectations, we will replace the animal, providing you return the animal to our ranch at your expense. We will provide you with a replacement animal or give you full credit toward next year's sale or a cash refund. This guarantee expires after the first breeding season. We ask that you provide travel expenses for the replacement animal. Customer Service is #1!

ANALYZE THE PERFORMANCE DATA

BW :: BIRTH WEIGHT We take birth weights on our cattle in order to give you some method of determining calving ease. Larger calves will sometimes come very easy. We believe that calf structure determines calving ease along with size.

WW :: WEANING WEIGHT This is the weight of the cattle taken at weaning time adjusted to a constant age of 205 days, and a good indication of early growth.

YW :: YEARLING WEIGHT This is the weight of the cattle waken at approximately one year of age and adjusted to a constant age of 365 days with at least 150 days between actual weaning and yearling weight dates.

ADG :: AVERAGE DAILY GAIN Growth rate is highly heritable and these numbers will give you an idea of how the cattle respond to environmental conditions. i.e. feed, weather, etc.

Here is a 62% Lim-Flex son of AUTO Trax 762F worthy of a lot of praise! LVLS Stabilizer 643J is out of LVLS 643D, a female that goes back to JCL Lodestar 27L. He ranks in the tenth percentile of the breed for both his weaning weight and yearling weight figures and in the twentieth percentile for his milk figure. It's easy to find power in a good numbered herd sire prospect, but it isn't every day that they match phenotypically and that's always been one of our main goals. We love a great all around bull that has the look, the performance and the lineage to hang with the best of them and this guy surely does. LVLS Stabilizer 643J is awesome in his muscle shape and expression, he's large topped and great on the move. He is homozygous black and heterozygous polled.

LVLS Stabilizer 49J is a 60% Lim-Flex bull sired by LVLS Maximizer 1012G, a son of LVLS Caesar 4C. This bull's dam is LVLS Ashtyn 48A, a daughter of CHR Wild Bill 150W. He is a rugged and powerfully made bull with added muscle expression and shape. LVLS Stabilizer 49J is a bull who is structurally correct and balanced from end to end. He is double black and double polled.

HOW TO FIND WHAT YOU ARE LOOKING FOR IN THE SALE

We first select without papers, finding all visible phenotypic defects and problems. Once the outliners are eliminated, we then select on paper, eliminating those cattle with performance, EPD or genetic problems. This two-step selection process is done at weaning and repeated again just before the sale with yearling data and semen checking added to the criteria. Of course, disposition is still the number one culling criteria in our herd. Choose the type of bull that best meets your cowherd or feel free to call us to further discuss your options. We would be happy to visit with you.

'MAXIMIZERS': Purebred & High Percentage Limousin Bulls These lean, red meat machines will maximize hybrid vigor on your British and British X cows. These bulls will maximize performance with- out sacrificing calving ease. Several of these prospects go back into the purebred industry each year, being purchased by other purebred breeders.

'STABLIZERS': 75% Limousin x 25% Angus Bulls Our most popular hybrid for 28 years, these ultra-thick and deep machines are unequaled in their muscle, volume and phenotype. These bulls work well on most any cowherd, offering the extreme thickness of Limousin and the volume of Angus. Hybrid vigor can be increased and maintained with these bulls on most all straight bred and crossbred cows.

'OPTIMIZERS': 50% Angus x 50% Limousin Bulls These Angus x Limousin F1 Composites have been a hit on our sale for many years as well. Many cattlemen are using these bulls to moderate their cow size and create consistency or in a four-way cross breeding sys- tem. Optimizers are moderately framed, very deep and offer much more thickness than the pure- bred Angus cattle.

'OPTIMIZERS': 25% Limousin x 75% Angus Bulls They are 25% Limousin and 75% Angus. These bulls combine the best of the numbers of the elite Angus combined with the prominent Limousin. These bulls are huge numbered and have some of the strongest weights and stats of the entire sale offering. These bulls bring the statement of Lim-Flex to a whole new level in our breed. We urge you to see for yourself how any one of these bulls might fit into your program to sire a uniform and very desirable calf crop.

'ANGUS': Purebred Registered Angus Bulls Over the past several years we have acquired over 100 Registered Angus females, along with flushing one of our top Angus cows in our Embryo Transfer Program, to promulgate a complimentary breed to our exist- ing lines of seed- stock. Our goal is to provide Purebred Angus bulls that can offer an ideal complement to high percentage Limousin based cows. We have known for years that the Limousin x Angus cross is the best, now we will be offering both sides of the equation.

LVLS Enhance 9098J is a January son of SydGen Enhance, a bull sired by SydGen Exceed 3223. This bull's dam is LVLS Ammie 9098A, a daughter of Connealy Final Product and out of an MYTTY In Focus daughter. His maternal weaned calf value ranks in the 15th percentile of the breed and his milk figure ranks in the 30th percentile of the breed. This is a hard-to-miss type of bull when it comes to genetic worth, performance value and overall phenotypic quality. In motion, this bull is sound and flexible off both ends and moves with such comfort.

Retaining two flushes (12 embryos total) when convenient with the new owner

Folks, this is the elite Red Angus donor female you've all been searching for! J6 Advance E501 is a female that will take any program to the next level. She is sleek in her design, powerful in her build and remains as feminine as any. She is capacious through her center third, deep in her rib, long in her skeletal makeup and tremendous on her feet and legs. This female carries herself with such elegance and turns heads from a mile away. Simply put, this female is hard to put a fault in- she's that good. J6 Advance E501 is a daughter of Six Mile Taurus 519A, the Six Mile Game Face 164Y son. Her dam is none other than the legendary JKC Berry Advance 36W, who has been a surefire donor female for so many years. Her progeny are still taking the Red Angus breed by storm across the country. This is an opportunity you won't want to missed.
